Distribuidora de Aceitis Mexicanos ACEIMEX, S.A. de C.V.
Norte 35 No. 983 Bodega 12
Col. Industrial Vallejo
C.P. 07729
Mexico, D. F.

SUBJECT: HIDRO LUB ISO 32, ISO 46, ISO 68

Dear Ing. Salazar:

This letter is written to identify a specific trade name for a fluid formulation previously approved. Based on the HF-2 approval dated 27 January 2000 and the bench test results and examination of P46 pump parts in Marysville on 10 November 1999 the subject fluid is approved for inclusion in our HF-0 list. It is noted that the fluid passed both the dry and wet phases of the vane pump test.

Approval is for a 10 year period and is extended on the basis that the fluid formulation will not be changed without prior notice to Denison Hydraulics, Inc. An additional 5 years can be added to the listing by notifying Denison Hydraulics in writing during the last 6 months of the initial listing period that the products are still being actively marketed.

The fluid will be listed as "HIDRO LUB ISO 32, ISO 46, ISO 68". The manufacturer will be identified as "Distribuidora de Aceitis Mexicanos ACEIMEX, S.A. de C.V." The listing will be dated 2 June 2000, the date of the original approval. It will appear on the next revision of the list.

Sincerely yours,

Richard A. Klimaszewski
Director of Engineering
